

Solutions

Motion · Switching · Fluid · Energy

English | Version 2.3.0 / 01684

One platform. A smarter yacht.

Bring your onboard systems together. Enjoy simpler control and more time to relax.

EXPLORE THE POSSIBILITIES.

Discover eight solutions across Motion, Switching, Fluid and Energy—and the value they bring on board.

SEE HOW IT FITS YOUR YACHT.

Each page introduces the benefits, capabilities and integration options for a different onboard system.

Start with one solution. Grow towards an integrated yacht.

Gangway

Safe and precise gangway control.

THE BENEFIT

Give guests and crew their own gangway control—from a familiar smartphone interface.

WHAT IT DOES

Up / Down / In / Out, with feedback where installed. Direction interlocks and emergency stop.

INTEGRATION

Complements suitable electric or hydraulic controls. Existing controls and safety circuits remain part of the setup.

COMPATIBLE SYSTEMS

NV · Besenzoni · Almar · Systems using QUICK R4+ remotes

Opacmare: contact us. Compatibility depends on model, interface and safety circuits.

smarter.yachts/
solutions#opmode-gangway

Tenderlift

Safe and controlled tenderlift operation.

THE BENEFIT

Bring tenderlift and lighting control into one interface, for launching, retrieving and boarding.

WHAT IT DOES

Up / Down, status feedback and lighting control. Safety stop and compatibility with existing manual controls.

INTEGRATION

Access from a phone, tablet or a plotter with a browser. Use the yacht Wi-Fi network for shared onboard access.

COMPATIBLE SYSTEMS

Tenderlift · Systems using QUICK R2+ or R4+ remotes

Movement, feedback and lighting integration depend on the installation.

smarter.yachts/
solutions#opmode-tenderlift

Windlass

Safe and controlled anchor handling.

THE BENEFIT

Choose a position with a clear view while anchoring, with windlass and deck-lighting control in one interface.

WHAT IT DOES

Up / Down, configurable runtime limits and safety stop. Chain counter: sensor measurement or time-based estimate.

INTEGRATION

Replace or complement an existing windlass remote. Retain suitable existing controls and safety circuits.

COMPATIBLE SYSTEMS

Lewmar · Quick · Systems using QUICK R2+ or R4+ remotes

Verify the model and wiring. Sensor measurement needs calibration; timed values are estimates.

smarter.yachts/
solutions#opmode-windlass

Electric Furler

Convenient and controlled sail furling.

THE BENEFIT

Control electric furling from a convenient position without adding another dedicated wired remote.

WHAT IT DOES

Furl / Unfurl, visual status and controlled switching. Safety interlocks, emergency stop and maintenance records.

INTEGRATION

Complements existing electric furler control circuits. Retain original local or dedicated controls.

COMPATIBLE SYSTEMS

Electric Code 0 / jib / genoa furlers · Wired Furl / Unfurl controls

Compatibility depends on the model and control circuit; verify the installation.

solutions#opmode-furler](https://smarter.yachts/solutions#opmode-furler)

Digital Switching

Centralized control of onboard systems.

THE BENEFIT

Bring lights and electrical equipment into one interface. Use timers to reduce unnecessary battery consumption.

WHAT IT DOES

Timer-based switching and clear state feedback. Momentary/bistable logic and Guest / Crew / Admin access.

INTEGRATION

Suitable DC or AC loads; external relays for higher loads.
Configurable control for new builds and retrofits.

COMPATIBLE SYSTEMS

Lighting · Navigation electronics · Fans · Auxiliary loads

Respect the 5 A/channel limit; use suitable external relays and circuit protection.

smarter.yachts/
solutions#opmode-switching

Valves & Pumps

Reliable control of fluid systems.

THE BENEFIT

Select tanks and operate pumps or valves from on board, without accessing hidden technical compartments.

WHAT IT DOES

H-bridge and spring-return valves, feedback and timers. Configured periodic valve cycles and maintenance records.

INTEGRATION

Combine valve position and available tank levels. Victron Cerbo GX can provide tank-level data.

COMPATIBLE SYSTEMS

Freshwater · Black/grey water · Watermaker tank selection

Valve feedback, tank data and control logic depend on equipment and configuration.

smarter.yachts/
solutions#opmode-pumps

Generator

Convenient control of your onboard generator.

THE BENEFIT

Combine generator control, battery needs and service information in one familiar onboard interface.

WHAT IT DOES

Start / Stop, configurable runtime and status indication. Battery-triggered automation, operating hours and logbook.

INTEGRATION

Victron Cerbo GX supplies available battery data. Retain original generator controls alongside Smarter.Yachts.

COMPATIBLE SYSTEMS

Cummins Onan · Fisher Panda · GENSET · Mase

Automation requires suitable data and thresholds; cloud logbooks depend on enabled services.

smarter.yachts/
solutions#opmode-generator

Dive Compressor

Reliable control for onboard dive compressor systems.

THE BENEFIT

Operate the dive compressor where tanks are being filled, with running status and service records in view.

WHAT IT DOES

Start / Stop, real-time running feedback and visual status. Filter replacement, oil-check and maintenance records.

INTEGRATION

Connect to suitable existing electrical control circuits. Keep filter and service history in the maintenance logbook.

COMPATIBLE SYSTEMS

Bauer Junior II · Bauer systems with similar electrical control

Follow maker filter intervals. The logbook does not measure breathing-air quality.
