

SMART YACHT SOLUTIONS - USE CASE

Spreader Light Control

Control and automate your spreader lights from anywhere on board.

THE SOLUTION

Smart lighting control for safety, comfort, and energy efficiency.

Spreader lights are often installed after delivery, making integration at the helm station difficult due to limited space for additional switches. Running new cables and installing physical controls can be complex, time-consuming, and visually intrusive.

Key benefits

- Turn spreader lights on/off from the app
- Automatic timer to prevent overnight battery drain
- No need for additional switches at the helm
- Remote activation to locate your yacht at night

KEY POINT 1

Turn spreader lights on/off from the app

KEY POINT 2

Automatic timer to prevent overnight battery drain

KEY POINT 3

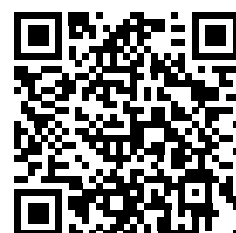

No need for additional switches at the helm

YOUR YACHT. YOUR CONFIGURATION.

Discuss your installation with us.
